

ATCO Electric is a part of the ATCO Group of Companies. ATCO Group, with more than 8,800 employees and assets of approximately \$13 billion, delivers service excellence and innovative business solutions worldwide with leading companies engaged in structures & logistics (manufacturing, logistics and noise abatement), utilities (pipelines, natural gas and electricity transmission and distribution), energy (power generation, natural gas gathering, processing, storage and liquids extraction) and technologies (business systems solutions).

ATCO Electric develops regulated distribution and transmission projects and plays a key role in the development of Alberta's industrial sector. The company is headquartered in Edmonton and has 38 offices throughout its service area in Alberta.

ATCO Electric serves nearly 213,000 customers in northern and east-central Alberta – resource rich areas of the province where electricity is an essential component of industrial development. The company has 85 years experience serving this challenging, diverse territory.

The company builds, operates and maintains a safe, reliable system of transmission and distribution lines, delivering power to homes, farms and businesses, in cities, towns and Aboriginal communities – 245 communities in all.

- > ATCO Electric has more than 2,000 employees living, working and volunteering in communities across Alberta.
- > ATCO Electric operates and maintains approximately 72,000 km of transmission and distribution lines.

- > In addition, the company operates approximately 10,000 km of distribution power lines on behalf of Rural Electrification Associations.

ATCO Electric is on call 24 hours a day to respond to power line and related emergencies.

ATCO Electric has two divisions: **Capital Projects** and **Operations**. The Capital Projects Division is responsible for major transmission construction projects. The Operations Division is responsible for the construction of large distribution projects and management of the operation and maintenance of existing transmission, distribution and technology assets along with new assets as they are commissioned into service.

Through its subsidiaries – Yukon Electrical Company Limited, Northland Utilities (NWT) Limited and Northland Utilities (Yellowknife) Limited – the company serves customers in Canada's North.
